ClearBridge

Global Infrastructure Value Strategy

Strategy Overview: A global listed infrastructure strategy suitable for investors seeking capital growth and stable income over the long term. The strategy invests in a range of listed infrastructure securities spread across geographic regions in both the developed and emerging markets.

Benchmark: OECD G7 CPI +5.5% Index

Comparison Index: FTSE Global Core Infrastructure 50/50 Net Tax Index

Strategy Inception: 31 August 2006

Strategy AUM: \$6.7B AUD

Holdings Range 30–60¹

Objective: Long-term inflation-linked capital growth over a full market cycle³

Investment Philosophy

By using a longer-term fundamental valuation approach when investing in listed markets, significant opportunities arise as listed markets misprice infrastructure assets in the short term

Portfolio Management Team

► **Charles Hamieh**
Managing Director, Portfolio Manager, 29 years experience

► **Shane Hurst**
Managing Director, Portfolio Manager, 29 years experience

► **Nick Langley**
Managing Director, Portfolio Manager, 31 years experience

► **Simon Ong**

This material is not suitable for retail investors. The investment manager, ClearBridge Investments Limited (ABN 84 119 339 052; AFSL No. 307727) does not authorise the provision of this material to retail investors. While this document has been prepared with all reasonable care, ClearBridge* accepts no responsibility or liability for any errors, omissions or misstatements however caused. This information is not personal advice. It has been prepared without taking account of individual objectives, financial situation or needs. Potential investors should seek independent advice as to the suitability of the Strategy to their investment needs.

*ClearBridge Investments consists of ClearBridge Investments Limited (AFSL 307727) (and its subsidiary); ClearBridge Investments, LLC; ClearBridge Investment Management Limited; the ClearBridge Australian Equities Investment team (a division of Franklin Templeton Australia Limited); and a part of Franklin

Templeton Investments Corp. All entities are wholly, indirectly owned subsidiaries of Franklin Templeton, Inc., a publicly traded company listed on the New York Stock Exchange (NYSE:BEN).

ClearBridge Investments, LLC claims compliance with the Global Investment Performance Standards (GIPS®). ClearBridge Investments, LLC ("ClearBridge") is a wholly-owned indirect subsidiary of Franklin Resources, Inc. ("Franklin"), which acquired ClearBridge's former parent, Legg Mason, Inc., in July 2020. The firm's foundation and claim of GIPS compliance date back to January 1997 through predecessor firms associated with Citigroup Asset Management, which was acquired in 2005. Since combining its institutional and retail businesses into a single GIPS firm in June 2008, ClearBridge has expanded through the integration of Global Currents Investment Management (April 2013), ClearBridge, LLC (January 2016), ClearBridge Investments Limited (May 2020), and the Equity Teams of Franklin Bissett Asset Management (January 2024). Most recently, the firm announced the integration of Martin Currie (MC) in 2025. For GIPS purposes, the business was organized into three distinct Strategies, MC Emerging Markets, MC Australian Equities, and MC UK Equities. MC Emerging Markets was completed in November 2025, MC UK Equities was completed in March 2026, and MC Australian Equities was completed in June 2026. GIPS compliance was claimed and ported individually for each MC team, where applicable.

The ClearBridge Global Infrastructure Value Composite generally hold between 30-60 different securities across a number of infrastructure sub sectors such as gas, electricity, water utilities, toll- roads, airports, rail and communication across developed and developing geographic regions. The portfolio is constructed to maximize the yield but also to achieve some capital gain and a reasonable overall return over the economic cycle. The composite may use options, futures or other derivatives to reduce risk, enhance income or gain exposure to the market for the underlying physical investments. The composite name was updated to ClearBridge from RARE in July 2020. ClearBridge has chosen an absolute return, inflation linked benchmark as the most appropriate primary measure against which to evaluate the long term performance of the Composite. This is an accumulation index comprised of the OECD G7 inflation + 5.5% pa. As a secondary measure of comparison, the FTSE Global Core Infrastructure 50/50 Net Tax Index, which is designed to track companies from around the world chosen to represent the listed infrastructure industry, is used. To receive a complete list and description of ClearBridge composites and/or a presentation that adheres to the GIPS standards, please contact us.
